Academic Year: 2021-2022

Batch: 2020-2024

Date of Assignment: 27.09.2021

Exercise 3: ListADT and its Applications

[CO1, K3]

ListADT will have character item and a pointer to previous and next node. Create a ListADT which has implementations for the following operations

Insert an item in the front of the list

`void insertFront(listADT L, char c)`

Insert an item at the end of the list

`void insertEnd(listADT L, char c)`

Insert an item 'd' after the first occurrence 'c' of the list

`void insertMiddle(listADT L, char c, char d)`

Display the items from the list

`void displayItems(listADT L)`

Delete the item present in the list

`void deleteItem(listADT L, char c)`

Search an element in the list and return the number of occurrences

`int searchItem(listADT L, char c)`

1. Demonstrate the ListADT with the following testcase

Initially L is Empty

`insertFront(L, 'A') →` header \leftrightarrow A

`insertEnd(L, 'B') →` header \leftrightarrow A \leftrightarrow B

`insertMiddle(L, 'A', 'E') →` header \leftrightarrow A \leftrightarrow E \leftrightarrow B

`insertMiddle(L, 'A', 'E') →` header \leftrightarrow A \leftrightarrow E \leftrightarrow E \leftrightarrow B

`search(L, 'E') → 2`

2. Create an application using the ListADT to do the following
 - a. Check whether the list is palindrome or not
 - b. Create separate lists containing vowels and consonants from the list
 - c. Swap kth node from the beginning with kth node from the end

Testcase for the Application

- a. Check whether the list is palindrome or not

Input: Header \leftrightarrow A \leftrightarrow C \leftrightarrow E \leftrightarrow K \leftrightarrow P \leftrightarrow I \leftrightarrow O \leftrightarrow U \leftrightarrow J

Output: Not a palindrome

Input: Header $\leftarrow \rightarrow A \leftarrow \rightarrow P \leftarrow \rightarrow P \leftarrow \rightarrow A$

Output: Palindrome

b. Create lists containing vowels and consonants

Input: Header $\leftarrow \rightarrow A \leftarrow \rightarrow C \leftarrow \rightarrow E \leftarrow \rightarrow K \leftarrow \rightarrow P \leftarrow \rightarrow I \leftarrow \rightarrow O \leftarrow \rightarrow U \leftarrow \rightarrow J$

Output:

Header1 $\leftarrow \rightarrow A \leftarrow \rightarrow E \leftarrow \rightarrow I \leftarrow \rightarrow O \leftarrow \rightarrow U$

Header2 $\leftarrow \rightarrow C \leftarrow \rightarrow K \leftarrow \rightarrow P \leftarrow \rightarrow J$

c. Swap k^{th} node from the beginning with k^{th} node from the end

Input: Header $\leftarrow \rightarrow A \leftarrow \rightarrow C \leftarrow \rightarrow E \leftarrow \rightarrow K \leftarrow \rightarrow P \leftarrow \rightarrow I \leftarrow \rightarrow O \leftarrow \rightarrow U \leftarrow \rightarrow J$

K=2

Output: Header $\leftarrow \rightarrow A \leftarrow \rightarrow U \leftarrow \rightarrow E \leftarrow \rightarrow K \leftarrow \rightarrow P \leftarrow \rightarrow I \leftarrow \rightarrow O \leftarrow \rightarrow C \leftarrow \rightarrow J$
